Meet Vora

Mobile Application Developer
Ottawa, ON | meetvora1994@gmail.com

Portfolio | LinkedIn | GitHub | StackOverflow | Medium

Passionate Mobile Application Developer with over 7 years of experience in designing and developing native Android and iOS applications. Skilled in Jetpack Compose, SwiftUI, and MVVM architecture. Proven ability to collaborate in team environments, lead code reviews, and teach good coding practices. Strong background in BLE device integration and real-time data applications.

▼ Experience

- **Lead Mobile Application Developer**

  Orbcomm | 2021 - Present

  - Led development of Android (Kotlin) and iOS (SwiftUI) apps for BLE device data transfer.
  - Managed and mentored a team, ensuring adherence to best practices and high code quality.
  - Conducted code reviews and enforced coding standards using GitLab.
  - Coordinated cross-functional efforts, including hardware team integration.
  - Developed and maintained project documentation and provided technical guidance.

- **Software Developer (Part-time)**

  SageTea Software | 2019 - 2020

  - Developed and maintained a WordPress website and distributed mobile applications.
  - Consulted with clients to understand their needs and provided regular updates.

- **Mobile Application Developer**

  Freelancer | 2019

  - Developed a news application with a user-friendly interface and smooth functionality.
  - Designed logos, incorporating clients' brand identity and vision.
  - Managed project timelines, delivering high-quality work within deadlines.
  - Communicated effectively with clients for tailored solutions.

- Utilized feedback to refine and enhance final products, ensuring client satisfaction.

- **Software Developer**

  Ecosmob Pvt. Ltd. | 2019

  - Developed VoIP-based Android applications using Kotlin.
  - Conducted training sessions for junior developers on performance-driven coding.
  - Participated in the hiring process for Android application developers.

- **Software Developer**

  Hodusoft Pvt. Ltd. | 2016 - 2019

  - Published multiple applications to the Google Play Store.
  - Created white-labeled apps in Java with Firebase integration for real-time data sharing.
  - Integrated Google Maps API, payment gateways, and other third-party APIs.
  - Attended client meetings for new requirements and analysis.

▼ Education

- **Computer Programmer**

  Algonquin College | 2020
  GPA: 3.86

- **Bachelor of Computer Engineering**

  Gujarat Technological University | 2015
  GPA: 3.52

▼ Technical Skills

- **Programming Languages**: Kotlin, Java, Swift
- **Development Tools**: Android Studio, Xcode
- **Testing Frameworks**: JUnit, Espresso, XCTest
- **Version Control Tools**: Git, Git-flow
- **Databases**: SQLite, RoomDB, CoreData, FirestoreDB
- **Design Tools**: Figma, Adobe Illustrator

▼ Projects

- **ORBCOMM Field Support Tool** | *Orbcomm* | Play Store | App Store

  - Developed native Android and iOS apps using MVVM architecture for BLE device setup and configuration.
  - Integrated Google Maps API and REST API for enhanced functionality.
  - Implemented robust error handling and data synchronization features.
  - Collaborated with UX/UI designers for an intuitive user experience.

    - Optimized app performance for speed and reliability.
- **ORBCOMM Installation for HLAG** | *Orbcomm* | Play Store | App Store
    - Developed a tool for pairing CT1000 device containers, optimizing installation speed and reliability.
    - Utilized Bluetooth and device communication protocols for seamless integration.
    - Conducted rigorous testing and debugging for a flawless user experience.
    - Created comprehensive documentation for end-users and support teams.
    - Integrated feedback to make iterative improvements.
- **Printing Label Maker** | *Own Application* | Play Store
    - Developed an Android app with MVVM architecture and Firebase for cloud storage.
    - Implemented OTP-based authentication for secure login.
    - Designed features for label customization and printing.
    - Ensured smooth synchronization between local and cloud data.
    - Conducted user testing to enhance the overall experience.
- **Prachar Weekly** | *Freelance* | Play Store
    - Created a local news app using Kotlin for a news company.
    - Implemented features for news articles, notifications, and multimedia.
    - Designed a responsive interface for local readers.
    - Utilized analytics to track user engagement.
    - Incorporated user feedback for continuous improvement.
- **MyEDU Bus Tracker** | *Hodusoft Pvt. Ltd.*
    - Developed an Android app for real-time school bus tracking using Firebase for data transfer.
    - Implemented GPS tracking and real-time notifications.
    - Designed and optimized the user interface for ease of use.
    - Integrated analytics to monitor app usage and performance.
    - Addressed user feedback to enhance app features.
- **Image English School** | *Hodusoft Pvt. Ltd.*
    - Built a communication platform for parents, teachers, and students.
    - Implemented messaging, notifications, and document sharing features.
    - Designed an intuitive interface for user interaction.
    - Managed updates and bug fixes based on user feedback.

    - Ensured compliance with data protection regulations.
- **HoduPhone** | *Hodusoft Pvt. Ltd.* | Play Store
    - Developed an SIP client app for HoduPBX for cost-effective VoIP communication.
    - Integrated VoIP features including call forwarding and voicemail.
    - Optimized performance for minimal latency and high-quality calls.
    - Coordinated with network engineers for reliable connectivity.
    - Provided ongoing support and maintenance.
