BIOGRAPHY

With a penchant for coding and a love for design, I'm the kind of developer who dreams in code and hunts bugs even in my sleep. I enjoy developing apps using Jetpack Compose and SwiftUI which are best native options for Android and iOS applications and MVVM architecture.

EDUCATION

Computer Programmer
Algonquin College 2020 | GPA: 3.86

Bachelors of Computer Engineering
Gujarat Technological University 2015 | GPA: 3.52

TECHNICAL SKILLS

Development Tools
Android Studio and xCode

Programming Language
Kotlin, Java, Swift

Testing Framework
JUnit, Espresso, XCTest,

Version Control Tools
Git, Git-flow

Database
SQLite, RoomDB, CoreData, FirestoreDB

Designing
Figma, Adobe Illustrator

EXPERIENCE

Mobile Application Developer
Orbcomm | 2021 - Present
Developed native apps for Android (Kotlin) and iOS (SwiftUI) to connect with BLE devices to transfer data between app and device. Working in a team environment and doing code collaboration using GitLab. Also, I maintained good coding base as a code-reviewer role. Taught fellow developer about good coding practices.

Software Developer (Part-time)
SageTea Software | 2019 - 2020
Developed and maintained a website with WordPress. Distributed mobile applications. Consulted with clients to understand their needs and provided regular updates.

Software Developer
Ecosmob Pvt. Ltd. | 2019
Developed and maintained VoIP based Android using Kotlin. Gave training sessions to junior developers to write performance-driven code. Taken interviews to hire the best Android application developers for the organization. Responsible for code inspection and new development analysis.

Software Developer
Hodusoft Pvt. Ltd. | 2016 - 2019
Published many applications to the Google Play Store. Created white-labelled apps in Java. Firebase push-no- tification, realtime-database integration for sharing realtime location map. Created mock-up designs. Attended client meetings for new requirements and analysis.

PROJECTS

ORBCOMM Installation for HLAG *ORBCOMM | PlayStore | AppStore*
The purpose of the ORBCOMM INC installation for Hapag-Lloyd is to pair CT1000 device containers. We are dedicated to providing a simple, purpose-built program that makes installing CT1000 devices fast, simple, and dependable.

ORBCOMM Field Support Tool *ORBCOMM | PlayStore | AppStore*
MVVM architecture Kotlin-Android and SwiftUI-iOS native application. This application allows ORBCOMM installers to setup company's BLE devices and configure them. This application integrates Google Maps API, Firebase Crashlytics, REST API integration, BLE OTA upgrade using Nordic's DFU implementation.

Printing Label Maker - Android App *Own Application | PlayStore*
Developed this application using Kotlin and MVVM architecture. I used Firebase cloud firestore database in this application. Also, I have implemented the phone OTP based authentication login in this application.

Prachar Weekly - Android App *Freelance | PlayStore*
This is a news application for a famous local newspaper brand called Prachar Weekly – it shares local news to the users of city of Visnagar, along with the news of nearby cities. Developed this application using Kotlin. Available on the Play Store with 1k+ installs.

Image English School - Android App *Hodusoft Pvt. Ltd | PlayStore*
This app is a 'One-stop' solution providing an enhanced communication and interactive experience to users such as parents, teach- ers and students. Our focus is to connect different dimensions of education with the right technology that is easy to use. Developed this android application in Java. Available on Play Store with 5k+ installs.

MyEDU Bus Tracker - Android App *Hodusoft Pvt. Ltd. | PlayStore*
This application shows real-time location tracking of school busses, which gives parents abilitie to know childrens locations at all time. This application is specially crafted for the school bus drivers, which emit realtime location every second, there- fore lertting parents who are users of MyEDU app see real-time locations of school busses. I have used firebase for real-time data passing of the current location of bus.

HoduPhone - Android App *Hodusoft Pvt. Ltd | PlayStore*
HoduPhone is an SIP client for the HoduPBX product. HoduPhone supports the SIP proto- col. It makes communication easy and cost-effective. Based on the LinPhone which uses VoIP functionality.
